BILLY, THE WONDERFUL BOY.

(Tune: "When Johnny Comes Marching When Bryan went east to make his speech,
"Twas sad. 'Twas sad.
His throat was sore and he could not screech,
Too bad! Too bad!
So he read them off twelve thousand words,
Which drove the people out in herds.
And they all felt sad for
Eilly, the wonderful boy.

He found New York was not the place

To blow. To blow.

They put the brakes on his fiery pace.

Go slow! Go slow!

The people they are up to snuff

And know when they have got enough.

And they all felt sad for

Billy, the wonderful boy.

They would not let him go to Maine.
Indeed? Indeed?
The reason now is very plain.
Tom Reed! Tem Reed!
They know that Tom would turn him down With his "cross of gold and thorny crown"
And we'd all feel sad for Billy, the wonderful boy.

Four years ago it was free trade.

"Tis true. "Tis true.

Prosperity then he did raid
He knew. He knew.

That he would make the people think
That free trade was the "missing link.
And they all felt sad for
Billy, the wonderful boy.

The people now will make their speech.

Don't fret. Don't fret.

They'll talk quite plain to this young peac
You bet.

He'll think free silver's everdene
When he's laid out "Sixteen to one."

Then we'll all feel sad for
Billy, the wonderful boy.

With free trade "we won't do a thing."
Oh, no! Oh, no!
We'll give our money an honest ring.
That's so. That's so.
"We'll open our mills instead of mints."
And give our labor a "lead-ope cinch"
Then we'll all bil farewell
To Billy, the wonderful boy.

Prosperity then will return.

Tis clear. 'Tis clear.

McKinley will be in the firm.

To steer! To steer!

The "Ship of State" in channels true.

Her flag unfurled. "red, white and blue."

Then we'll all feel safe with

McKinley at the helm.

THE 16 TO 1 QUESTION.

Every back organized in the past twenty years was capitalized with money worth 100 cents or on a gold basis. Every dollar of deposit held by a bank now is worth 100 cents in gold. Therefore, any bank that advocates the free and unlimited coinage of silver, not confining it to that produced in the United States, should guarantee its stockholders, and especially its depositors that they shall be paid in equal value as the money they deposited. There is in the world coined and uncoined silver in round numbers 64 billion dollars. Can any sensible man believe that the United States with 16 hundred millions of money, can raise the value of silver in the local states with 16 hundred millions of money, can raise the value of silver in the local states with 16 hundred millions of money, can raise the value of silver in the bowels. The "Crackers" say a person not used to it is hard on the bowels. The "Crackers" say a person not used to it will always be effected that way. We drink as little of it as possible.

We built us a little house 14x24, one story, with a kitchen disconnected from the main house to prevent heat in the house. Built it on the town lot allotted to me by the Colony company. It has two rooms and unplastered. It only cost including material and labor \$55.50. Lumber is only \$6 per thousand. We moved into it the list of August. vocates the free and unlimited coinmoney, can raise the value of silver in the markets of the world 65 per cant the lst of August.

Russia has built 4,000 miles of railway through a contary similar to our Dakotas. She now exports wheat. The Argentine Republic and India, with Russia, are practically supplying and establishing the price o' wheat for the world. The compititions that America must meet under free trade is the lowest free labor of the world. India is our competitor in cotton, wheat and rice. The average earnings of an India farmer and his family are \$10 a year. The average earnings of an American labor is \$342. The amount of money in "gold bug" England is \$17.90 per capita; in the United States \$25.62. The national debt of Great Britain is \$90 per capita, United States \$13. Great Britain has 1 pauper for every 39 inhabitants, United States 1 in 12. Bricklayers in Great Britain get \$1.17 per pay, United States \$3; carpenters in Great Britain get \$1.28 per day, United States \$2.50 on through the list of States \$2.50 on through the list of Grey While others the reverse. If we have a mount of money in "gold bug" England the country as I expected to see it, only there is less grass covering the ground. Good corn, cotton, fruit and vegetables were grown this year on old ground. All kinds of vegetables are high. Irish potatoes are scarce and bring \$1 per bushel. I would say that living generally was high. It gets warm here all right, everybody and his mother carries an umberella rain or shine.

For some the climate has done wonders, while others the reverse. If we States \$3. So on through the list of labor. Our government collects less than \$6 per capita in taxes; Great Britain \$12 per capita, but why enumerate these on all matters of statis-

In anticipation of free silver every bank in the country is hoarding gold, Why? Not a banker in this country but knows that with the unlimited coinage of silver without being restricted to this country, that it will be an impossibility to retain the ratio of gold and silver and that silver will be worth its bullion value and no more. In all sincerity and candor the depression in this country is caused in my opinion from natural causes. First, trying to compete with the cheap labor of the world; second, the devolopment of the resources of other countries that have come in competition with us; third, by unrestricted emigration. While changes might be made in the form of our money, it is an absolute certainty that no relief with a depreciative money. And as for the recent cold wave. 95 per cent of the business of the country is done by checks, I see no reason to advocate a depreciative money unless it is for the purpose of repudiating one-half the debts of the country.
